Lead Tiers

100%

Automated

THE CHALLENGE

Texas real estate agencies receive high lead volumes — without structure.

No Lead Scoring

Every inquiry treated equally regardless of urgency, budget, or intent.

Delayed Follow-Up

Manual routing causes hours of delay — competitors respond in minutes.

Fragmented Data

Lead info scattered across emails, spreadsheets, and personal notes.

Generic Outreach

Same follow-up email sent to first-time browsers and ready-to-buy buyers.

Zero Visibility

No reporting on which lead sources or price ranges convert best.

THE SOLUTION

A 22-step intelligent lead qualification pipeline.

Every inbound lead is automatically captured, looked up, scored, routed into the right CRM tier, and contacted — without any manual work.

01
Capture
Google Form response triggers the Zap instantly

02
Qualify
Sheets lookup scores lead as HOT / WARM / COLD

03
Route
Zapier Paths branches into 3 personalized tracks

04
Engage
Notion CRM updated + tailored emails sent automatically

TOOLS USED

Google Forms
Lead intake trigger

Google Sheets
Lead data lookup

Zapier Paths
Conditional routing

Notion

Formatter
Date & text parsing

22-Step Zap — End-to-End Flow

Google Forms — Trigger

1. New Form Response

Google Sheets — Lookup

2. Lookup Spreadsheet Row

3. PATHS — Split into HOT / WARM / COLD

HOT

4. Path conditions
5. Create Notion Item
6. Send Email (Lead)
7. Send Email (Agent)
8. Format Date/Time
9. Format Text
10. Update Notion

★ *HOT: dual email (lead + agent)*

WARM

11. Path conditions
12. Create Notion Item
13. Send Email
14. Format Date/Time
15. Format Text
16. Update Notion

COLD

17. Path conditions
18. Create Notion Item
19. Send Email
20. Format Date/Time
21. Format Text
22. Update Notion

HOT · WARM · COLD — How leads are classified.

Zapier Paths evaluates each form response against conditional rules to route the lead into the right tier — instantly, without human intervention.

HOT

Steps 4 – 10

CRITERIA

Ready to buy · High budget · Wants fast contact

AUTOMATED ACTION

Notion CRM created → Email to lead → Email to agent → Date + text formatted → Notion updated

Only tier with dual email — both lead AND realtor are notified immediately.

WARM

Steps 11 – 16

CRITERIA

Interested · Mid-range budget · Still evaluating

AUTOMATED ACTION

Notion CRM created → Single follow-up email → Date + text formatted → Notion updated

Nurture sequence — keeps lead warm until budget or timeline crystallizes.

COLD

Steps 17 – 22

CRITERIA

Early research · Low urgency · Low budget signal

AUTOMATED ACTION

Notion CRM created → Informational email → Date + text formatted → Notion updated

Long-term pipeline — data preserved for future re-engagement campaigns.

Before & After Automation

BEFORE	AFTER
✕ All leads treated the same — no scoring or prioritization	✓ Automatic HOT / WARM / COLD scoring on every lead
✕ Manual data entry into spreadsheets or sticky notes	✓ Data auto-saved to Sheets + Notion CRM instantly
✕ Follow-up delays of hours or days	✓ Outreach triggered within seconds of form submission
✕ No segmentation — generic emails to all leads	✓ Personalized email per tier — right message, right time
✕ No CRM — no visibility into pipeline or lead quality	✓ Full CRM pipeline with tags, dates, and audit fields
✕ Agent time wasted on unqualified leads	✓ Agents focus only on HOT leads — maximum conversion

Simulated Results — 60 Monthly Leads
